

A close-up photograph of a tree trunk with rough, textured bark. A small, vibrant green maple leaf is growing out of a hole in the bark, symbolizing growth and sustainability. The background is dark and out of focus.

# GREENING A PRODUCT LIFECYCLE ... AND MAKING MONEY AT IT! THE HP EXPERIENCE

Christian Verstraete  
Chief Technologist – Manufacturing  
January 27<sup>th</sup>, 2010

“The best energy is the energy that is not used.”

Jean-Pascal van Ypersele  
Vice Chairman  
Intergovernmental Panel on Climate Change

# SUSTAINABLE DESIGN: DELIVERING SOLUTIONS DESIGNED FOR THE ENVIRONMENT

## Design for Environment

DfE since 1992, design products to reduce impact on the environment while maximizing value to customers, design for recyclability

**Product return, re-use & recycling** – programs and services taking responsibility for sound end-of-life management. Reuse materials in new products.

Use

## Manufacturing & Supply Chain

— manage production processes to optimise overall environmental performance, use of recycled materials, smart packaging

**Customer Use** — more energy efficient products; solutions to measure and increase efficiency of data centers, clients and printers

## Reducing impact throughout the product life cycle

# BUSINESS CHALLENGES WE HEAR FROM CUSTOMERS

## Reduce Costs

"How can I reduce my energy consumption to lower costs and help meet our environment goals?"

"Is there a way to eliminate waste and improve productivity and efficiency?"

"About 40% of my Opex goes to energy."

## Mitigate Risk

"I have been stockpiling IT equipment for years, can you help me get rid of it so my data is protected and the environment isn't harmed?"

"I want to purchase environmentally preferable products but don't know how."

"Help me reduce our carbon footprint and prepare for regulation."

## Enable Growth

"How can you help enable our environmental and sustainability initiatives?"

"My SLAs are being impacted by power and cooling capacity"

"I can't source additional grid capacity"

# MATERIALS INNOVATION

## Mitigate Risk

- Materials substitution
- Eliminating materials of concern
- Reducing materials use
- Innovative and recycled materials

HP product materials restriction/substitution timeline<sup>1</sup>

<sup>1</sup> Dates refer to when the materials restrictions were adopted by HP. Often regulations allow exemptions for certain applications for some materials, and HP may take advantage of those exemptions. Materials in gray text beyond 2009 have been identified by stakeholders as potential materials of concern. Future possible restriction of those materials depends, in part, on the qualification of acceptable alternative materials.

# ENERGY AND RESOURCES SAVINGS:

## HP ECO SOLUTIONS INNOVATIONS

*Reduce Cost*

### HP Deskjet D2545 Printer

- 83% recycled plastic content by weight
- 100% of the outer casing and tray parts made from recycled content
- ENERGY STAR® compliant, power consumption decreased by 40%  
(from previous Deskjet models)
- Packing and storage efficiency improved by over 28%
- More than 70 percent of ink cartridge is recycled content from used HP cartridges collected through HP Planet Partners

# WALMART DESIGN CHALLENGE

*Enable Growth & Reduce Cost*

## HP Wins Walmart Design Challenge with Innovative Notebook Packaging

**BENTONVILLE, Ark., September 3, 2008** – Walmart today named HP the winner of its Home Entertainment Design Challenge, singling out the technology company for further reducing the environmental impact of personal computers. The HP Pavilion dv6929 Entertainment Notebook features an innovative design that reduces product packaging by 97 percent, conserving fuel and reducing CO2 emissions by removing the equivalent of one out of every four trucks

1. The PC, battery, AC adaptor, cord and documentation are packed in the messenger bag.
2. An insert is added and the polybag is closed and labeled.

3. Messenger bags are then placed in an overpack box and shipped to stores.
4. The customer takes home the computer in the stylish messenger bag—without any packaging.

### Offer includes:

- Free Recycling
- EnergyStar® qualified PC with EPEAT™ Silver registration
- Aggressive power-management settings
- Bag made with 100% recycled material

# BUILD FOR THE ENVIRONMENT

Manufacturing

# LEADING SUSTAINABLE PRACTICES THROUGH OUR SUPPLY CHAIN

## *Mitigate Risk*

- first IT company to implement a supplier code of conduct in the late 1990s.
- jointly develop the Electronic Industry Code of Conduct in 2004
- audited suppliers representing >95% of spend
- first in Electronics Industry to publish supplier list
- first to announce emissions data of our largest suppliers
- first electronics company to qualify for SMARTWAY

# HP TRANSPORTATION MILESTONES

- All consumer desktops and monitors qualify to display the U.S. Environmental Protection Agency (EPA) SmartWay logo
- HP was the first electronics company to qualify
- HP was awarded SmartWay Excellence Award from EPA

# TOTAL CUSTOMER EXPERIENCE

Use

# ECO 2.0 DATA CENTRE – WYNYARD PARK

## Cooling

- 97% Outside Air Economizers
- Variable Speed Fans
- low velocity undercroft plenum pressurized to 20 pascals
- ~50% carbon reduction\*

## Monitoring

- ENMS system continuously monitors and optimizes energy consumption
- BREEAM expected rating "very good"

## Power

- 10% Renewable (not on premises)
- High efficiency UPS and generators
- 20+% total power consumption reduction\*

## Lighting

- Dimmable, Addressable, Lighting Interface
- 40-50% energy reduction
- 45° orientation

## Data Hall

- Encapsulated Cold Air Aisles
- Distributed High Performance Servers
- Light Grey Racks
- Higher operating set points

## Building

- Southern Exposure
- 95% shell reuse
- 65% salvage recycled
- 25% new from recycled
- High efficiency Roof

## Grounds

- Groundwater Recovery System
- Restored Ecosystem
- Public Transportation

\* to comparable conventional facility

# INNOVATION - PHOTONICS

Copper that's never mined...

- 2012: Servers  
Annual savings: 13 TeraWatt-hours of electricity
- 2017: Servers + Chips  
Annual savings: 110 TWh of electricity
- Reduce the need to mine, smelt copper

Light...

# DELIVERING SMART CHOICES: HP ECO HIGHLIGHTS

*Enable Growth*

Identify environmental attributes of HP products quickly and easily

## ecoHIGHLIGHTS

### HP Deskjet D2545 Printer

#### ECO INFORMATION

- Made from 83% recycled plastic material
- Packaging is 100% recyclable
- Original HP 60 Black Cartridge bodies contain at least 50% recycled plastic (US Only)

- ENERGY STAR® qualified
- Delivered exclusively by SmartWay Logistics partners

[www.hp.com/ecosolutions](http://www.hp.com/ecosolutions)

Please recycle your computing hardware and printing supplies. Find out how at our website.

## ecoHIGHLIGHTS

### Energy Efficiency Design Services

#### ECO INFORMATION

- Maximizes space, performance and efficiency
- Solutions that effectively balance energy-efficiency with IT infrastructure requirements
- Potential annual energy savings of over 40% for large scale data centers
- Provides power and cooling design strategies to allow for future needs

- Leadership in Energy and Environmental Design (LEED) Green Building Rating System™
- Power Usage Effectiveness (PUE)
- Data Center Infrastructure Efficiency (DCIE)
- The Green Grid founding member – with practices being adopted by the European Commission's Code of Conduct on Data Center Energy Efficiency

[www.hp.com/ecosolutions](http://www.hp.com/ecosolutions)

Please recycle your computer hardware and printer supplies. Find out how at our website.

Remarket/refurbish

## HP Planet Partners

- Recycle used print cartridges
- Extends to customers in 53 countries
- No original HP Planet Partner cartridges are sent to landfills

# REUSE & RECYCLING IN PRACTICE

*Mitigate Risk & Enable Growth*

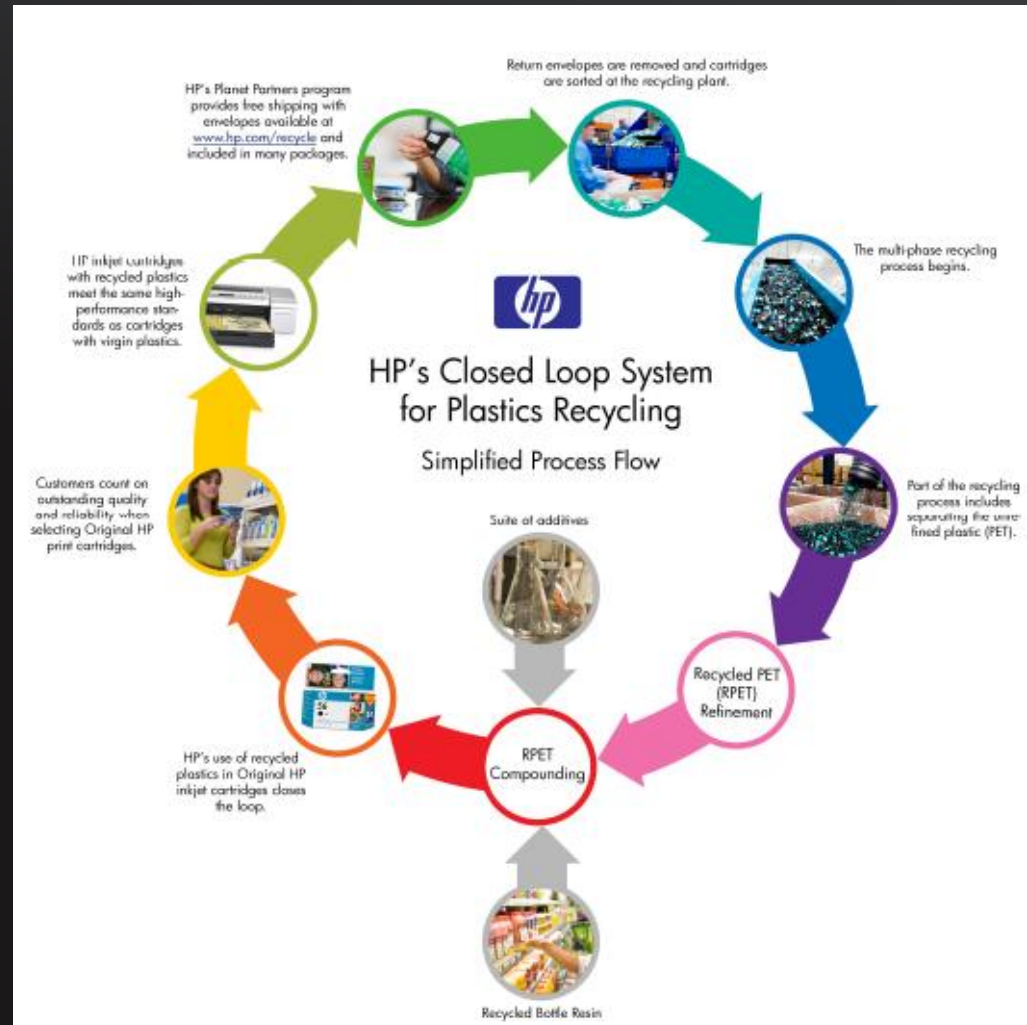

- In 2008, we increased reuse by 16% and recycling by 6%
- The objective is to have recycled 900,000 tonnes (since 1987) and recycle 200,000 tonnes (since 2003) by end 2010

# CARTRIDGE CLOSED LOOP PLASTICS RECYCLING PROCESS

## *Reduce Cost*

- HP's Cartridge Recycling process is an industry first that uses post-consumer recycled plastics in the production of new Original HP Inkjet print cartridges and still meets HP's demanding standards for quality and reliability
- In 2008, HP used 10.5 million pounds of recycled plastic from cartridges and water bottles in its original HP inkjet print cartridges, more than twice the amount we used in 2007.

# CONCLUSION

# WORLD WILDLIFE FUND (WWF)

Emissions  
reductions in  
our own  
operations

Product energy  
efficiency for our  
customers

A climate  
strategy to drive  
towards a  
low-carbon  
economy

Policy,  
collaboration,  
leadership

# WHERE ARE WE HEADED?

## HP will:

- Reduce the energy consumption and associated GHG emissions of all products to 40 % below 2005 levels by end 2011
- Reduce GHG emissions from HP-owned and leased facilities 20% under 2005 levels by 2013
- Double voluntary purchases of renewable energy to 8 percent by 2012
- Recover 2 billion pounds of computing and printing equipment by 2010 (since 1987)
- Triple the amount of recycled materials used in our inkjet printers by 2010 (relative to 2007)
- Reuse 450 million pounds (200,000 tonnes) of electronic products by the end of 2010 (since 2003)
